Equality Objectives 2026-27

Objective	Reason for objective	Actions	Success Criteria
1. Raise awareness of diversity of culture and religion	Pupils know too little about different cultures and lifestyles to enable them to understand the diverse nature of British society.	We will do this through : 1.Our program of assemblies, visitors, and visits. 2. Opportunities within the curriculum	Children will have improved knowledge and awareness of other faiths and cultures than their own. This will help foster tolerance and understanding towards others
2. To help foster good relations between our older and younger generations	To enable our children to build relationships with the older generation and understand that they have things in common.	We have made links with the residential care home 'St James Court'. Each class will take turns to visit the home once a week. Children will read to the residents and chat about school etc. The idea is to build good relationships.	Children will be more caring and empathetic towards the older generation. They will more easily be able to build relationships with people older than themselves.
3. To further raise awareness of the importance of ensuring equality of opportunity for all members of the school community	1. For all staff and governors to be aware of their responsibilities under the equality ACT 2010 2. For that awareness to be manifested in all areas of school life including interactions between adults and children and between all children.	1. An initial whole staff training session focusing on the equality Act. 2. A staff inset to map "no outsiders" scheme of work for promoting diversity. 3. An information session for governors, explaining our strategy for raising awareness.	The whole school community will have an improved understand of their duties in relation to the equality act. The curriculum will be a vehicle for promoting equality and diversity.
